Test Engineer, Wipro Ltd -Fulltime

February 2019 – February 2022

- My Wipro Internal Portal
- As a functional tester, I worked on My Wipro portal and is involved in performing regression testing using Selenium scripts.
- Based on the Business unit SPOC's requirements CR's are implemented and changes are eventually moved to production for end users
- Involved in CR analysis on every service package release for different types of regression testing.
- Working on Jira tool where the defects were reported and tracked during testing process.
- Strong Functional Testing background including defining Test strategy, test planning, design and execution.
- Communicated closely with IT personnel and clients to identify and maximize opportunities to improve product services.

TECHNICAL SKILLS

- Selenium
- Core-Java
- BDD
- Cucumber
- TestNG
- Maven
- Jenkins
- GIT
- SQL
- API requests
- Rest Assured
- gRPC

KEY SKILLS

- End to End testing
- Test case creation
- Creation of automation scripts
- Strong debugging & troubleshooting knowledge
- Defining Test scope and approach
- Documentation & Reporting
- Regression Testing
- Monitoring and taking corrective actions to ensure quality of products.

TOOLS

- POSTMAN
- IntelliJ
- Rally
- Jira
- Eclipse
